

SIMON SAYS

OBJECTIVES

- Recognize Shapes & Colors
- Experiment with Balance*
- Follow directions

*Indicates STEM and/or Common Core objectives

GRADES

PreK-2

ESTIMATED TIME

Flexible

MATERIALS NEEDED

- [GeoPlay Sets](#)

SETTING THE STAGE

As a class, point out different shapes and colors in the classroom.

PROCEDURE

Give students (individuals or groups) GeoPlay pieces.

Students will work to build structures based on the instructions and guidelines set forth for each round.

Note: Students will use the GeoPlay pieces that were given to them; they will not get more or swap unless the teach says to. Some guidelines will mean that students have different amounts of pieces to work with. This is not a competition.

SIMON SAYS

PROCEDURE

Suggested guidelines:

- Build the tallest tower you can with the pieces you have.
- Build a structure that only uses the blue and yellow pieces (pink and purple, etc).
- Build a structure using only square and triangles (half circles and squares, etc).
 - Work with your neighbors to build a structure that makes a circle.

FOLLOW UP

Review shapes and colors again using GeoPlay pieces.
