A KEVA® Sculpture Garden

OBJECTIVE: Students will create temporary 3D art with KEVA planks.

MATERIALS: • 100–200 KEVA planks per student

PROCEDURE:

- 1.** Discuss with the class the concept of three-dimensional construction. Students should note that all sides of the piece will be visible. The viewer will be able to walk around the piece to see it from all angles.
- 2.** Also discuss the concept of temporary art (for example, sandcastles, birthday cakes, Christmas trees, light shows, flower arrangements).
- 3.** Have students create their own structures. You may have a completely open-ended assignment, which would include abstract as well as realistic themes. Or, you may want to limit the building to a specific theme such as nature, animals or buildings.
- 4.** After students are finished, conduct a stroll-through tour of the sculpture garden you have created. Have each child tell about his or her piece.
